

Super-Flex Series 3 Material Loaders

Reliable Material Loading for Small and Medium Injection Molding Machines

- Heavy duty stainless steel
- Polished inside and out
- Low compressed air consumption
- ISO 2852 / Class 3A Finish
- Quick-Clamp Assembly
- Clamp-on Hose for easy access
- Powerful material wand
- Oversized filter
- Rated upto 500 pounds per hour
- 5 year Warranty

Super-Flex Series 3 Loaders are ready for Medical Molding and affordable!

Although they are ready for a clean room they are priced for any budget. Super-Flex 3 Loaders are constructed of stainless steel with machined ferrules and clamps for easy access. The filter can be cleaned during operation and is within normal reach. The heavy duty design is durable and will not flex or wobble during operation.

The unique AAE accelerator is very energy efficient. The accelerator is mounted on the bottom of a vented wand providing reliable loading from the bottom of any gaylord.

Standard controls feature a SMC filter regulator and solenoid valve combined with an IMF Effector material switch.
