

Stackable Material Drums

No Spill Drum Systems.

360 Degree view of material level.

Heavy Duty thick wall for years of use.

Tapered design allows nesting of empty drums.

Lever bands, for easy access and a dust tight seal

Optional Drum Heads for loading and unloading from grinders or gaylords.

Designed for years of use.

Keeping your plant clean and your material ready for use has never been easier. Your material will be kept spill and dust free in use at press side or in storage waiting for the next job.

AAE Stackable Material Drums feature a tapered design for valuable cost efficiencies and a patented bumper feature for added protection. They are made from a high molecular weight high-density polyethylene resin and manufactured to the highest standards of quality and consistency.

**55 Gallon 23.8" dia., 37.7 height,
275 LBS. @35 LBS./CU.FT.**

Drum Heads with wand adaptors for press side loading and or unloading systems for grinders are available.
