## Advanced Auxiliary Equipment launches new web site

“Advanced Auxiliary Equipment's new web site features new products, manuals, videos and link to company store.

(1888PressRelease) [May 18, 2010](#) - Advanced Auxiliary Equipment, Inc. a manufacturer of quality drying, loading and blending equipment is introducing its new web site [www.dryers-loaders-blenders.com](http://www.dryers-loaders-blenders.com) The new site provides product information, videos and links to the company's online store. The new site features many new products including FlexMed Loaders. FlexMed series Loaders are designed for medical molders but they are price competitive with standard Loaders. Also included on the site are Drums Systems providing transparent drums for storing virgin and regrind material.

The new site features a video featuring the company's President Donald Rainville. Mr. Rainville is a member of the Plastics Pioneers and has been a leader in the plastics processing auxiliary equipment industry for over thirty years. Mr. Rainville and his family owned Universal Dynamics until 1995 and Mr. Rainville served as President for over twenty five years ending in 2006. Mr. Rainville has been granted numerous patents relating to drying and conveying plastic materials.

The new site includes a link to the company store where you can buy all of the company's products, review pricing or request a quote.

For more information go to the company web site or call (800) 918-5820.
